

## Trading Process for Android Phone

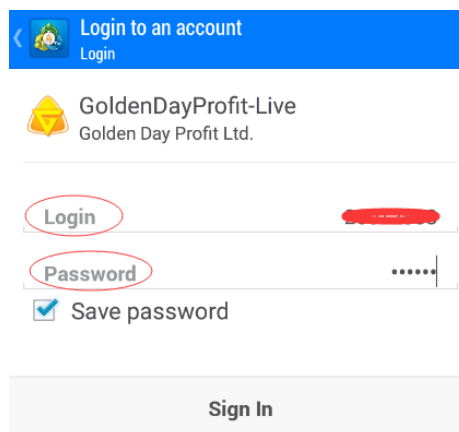

1. Open the installed MT4 mobile phone trading terminal and click "Login to an existing account".

2. Enter "goldenday" in the search field and click on "GoldenDayProfit-Live"

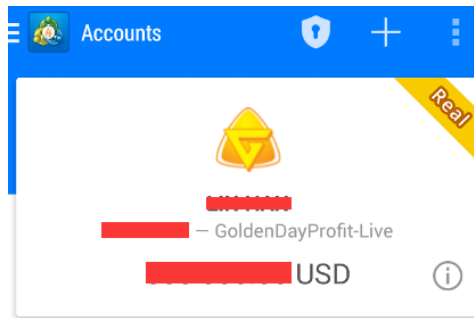

3. Enter your account number and password, click Sign In.

4. After logging in successfully, you can see the funds on the account, click

to enter the market quotes page.

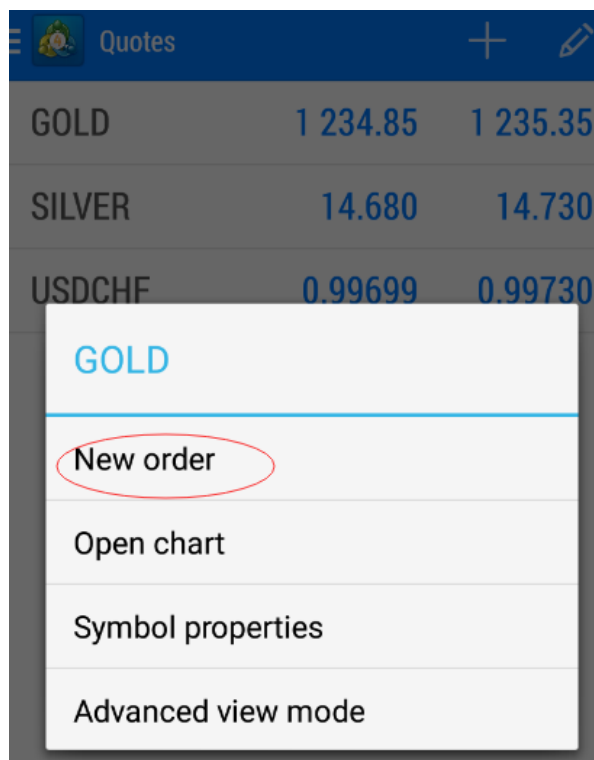

5. Enter the market quotes page to see the gold price and silver price.

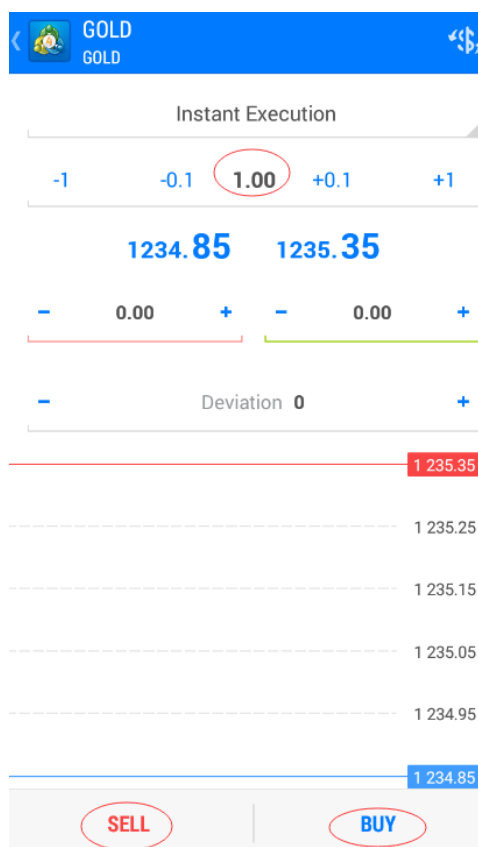

Quotes		
GOLD	1 234.85	1 235.35
SILVER	14.680	14.730

A screenshot of a mobile application interface showing a table of market quotes. The table has three columns: the first column lists the metal type (GOLD and SILVER), and the next two columns show price values. The "GOLD" row shows prices of 1 234.85 and 1 235.35. The "SILVER" row shows prices of 14.680 and 14.730. The "GOLD" text in the first column is circled in red.

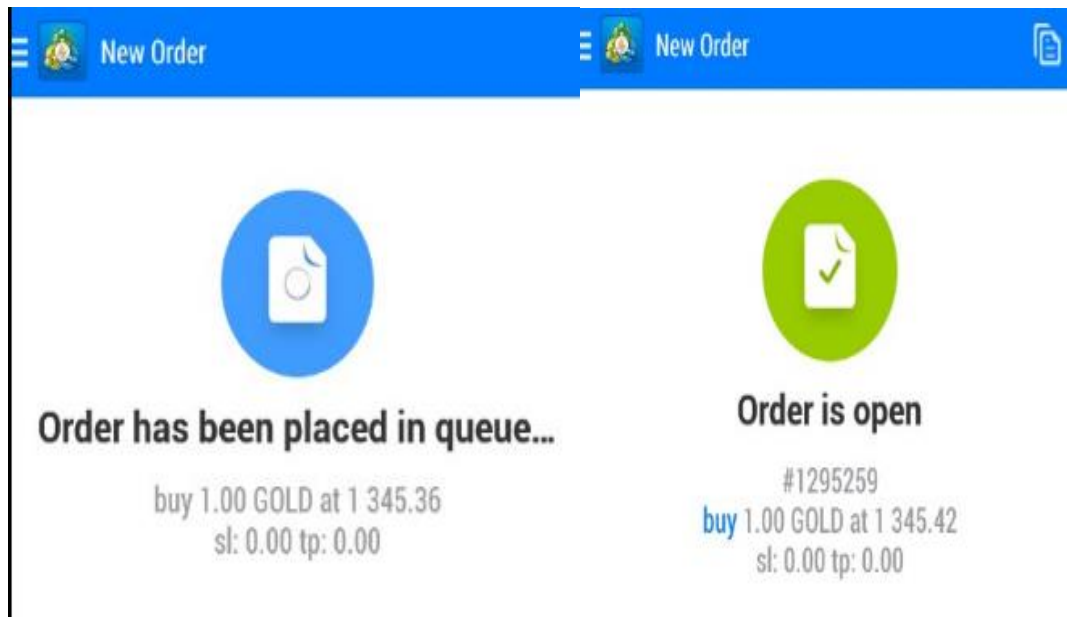

6. Select the order type, long press "GOLD" will pop up a new window, select "new order"

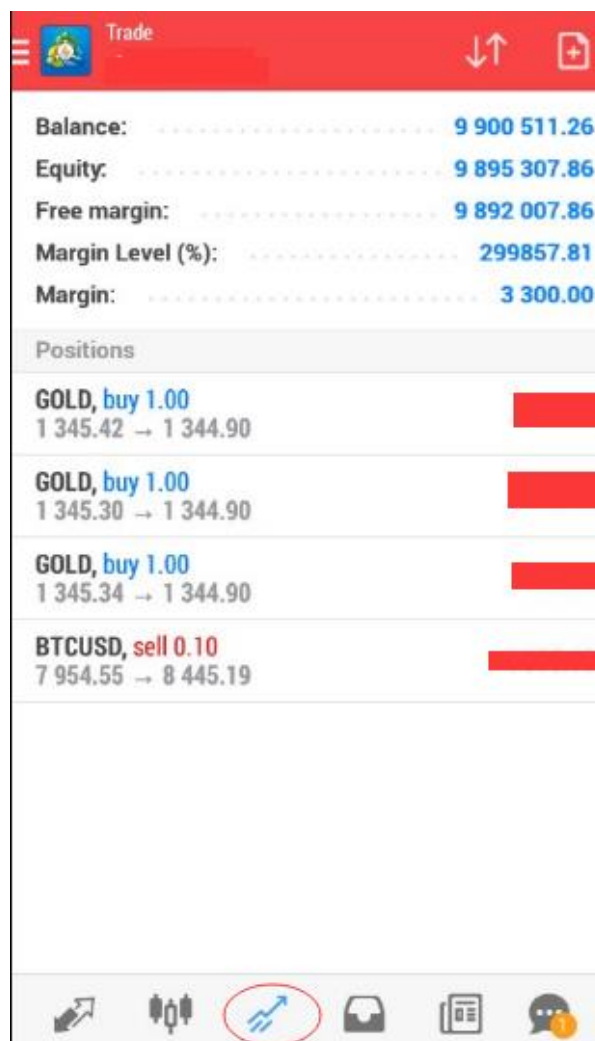

7. Select "Instant Execution", the number of lots can be input freely, or select the left and right to increase or decrease the number of lots. After confirming the price, click "SELL" or "BUY" to place an order.

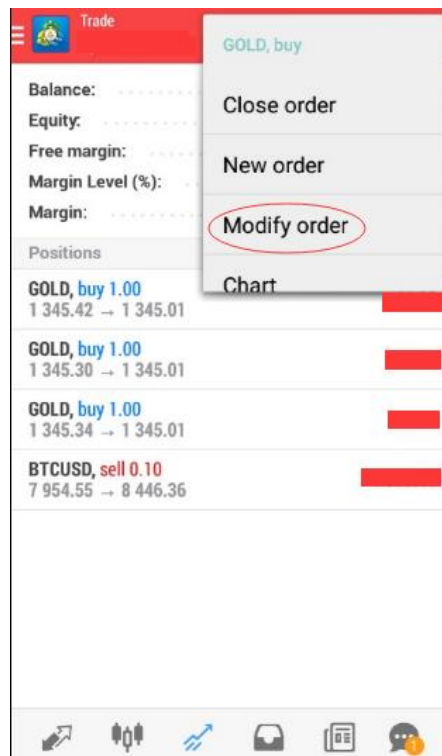

8. After the order is placed, “Order has been placed in queue...” and “Order is open” will pop up.

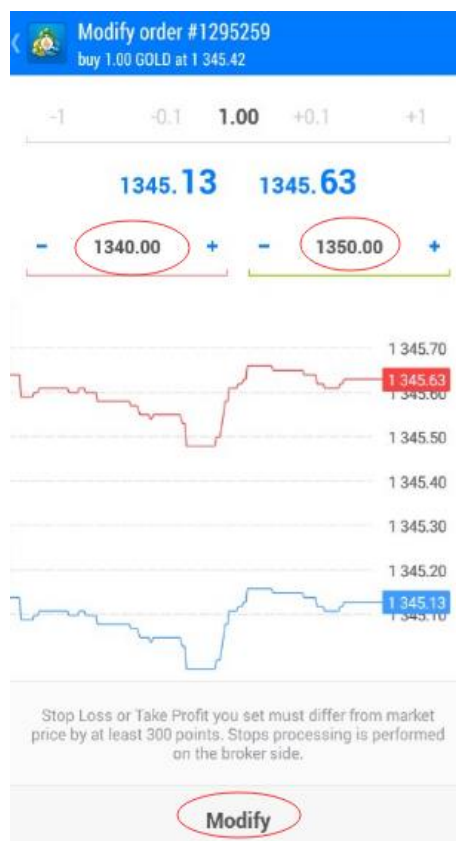

9. After successful order placement, the system will automatically transfer to the trading page, you can check the price and lot size of the order.

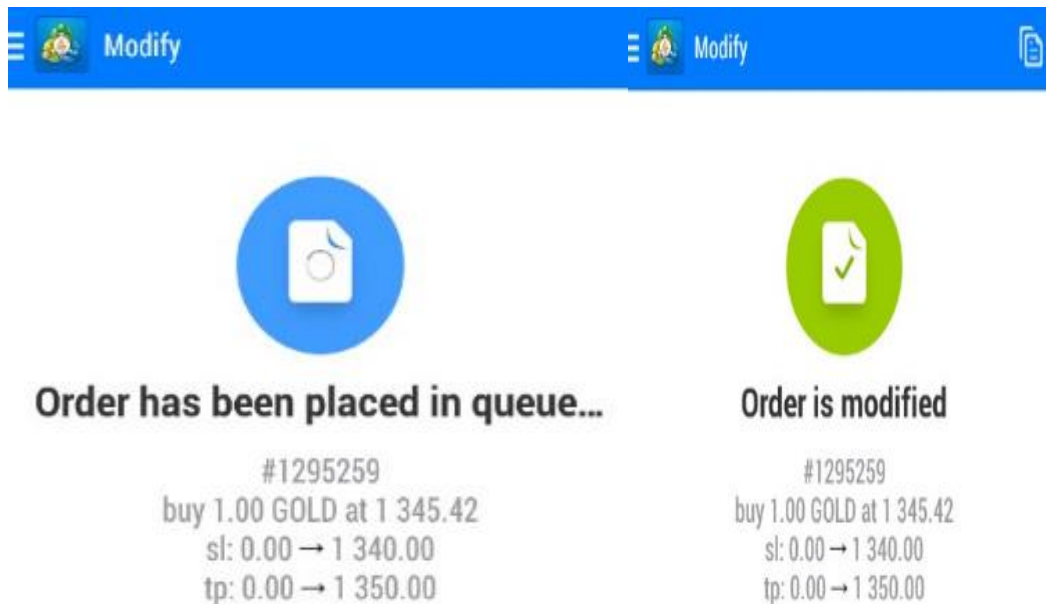

10. Set stop loss, take profit: long press the order in the price, a new window will pop up, click "modify order"

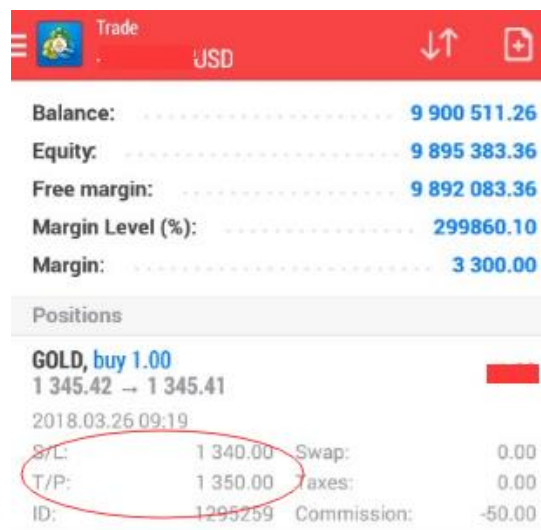

11. The modify order window pop up, enter the stop loss, take profit price and click "Modify".

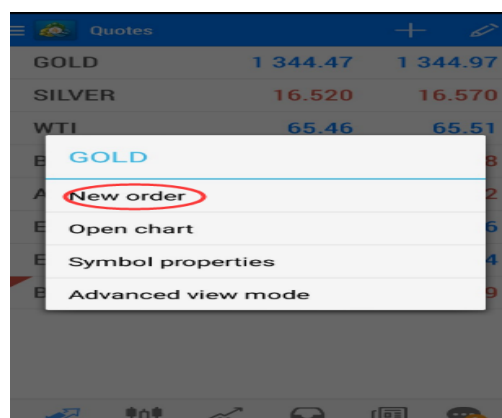

12. After the modification, a new window will pop up, "order has been place in queue..." and "Order is modified"

13. The trading page can check the price of your modified stop loss and take profit.

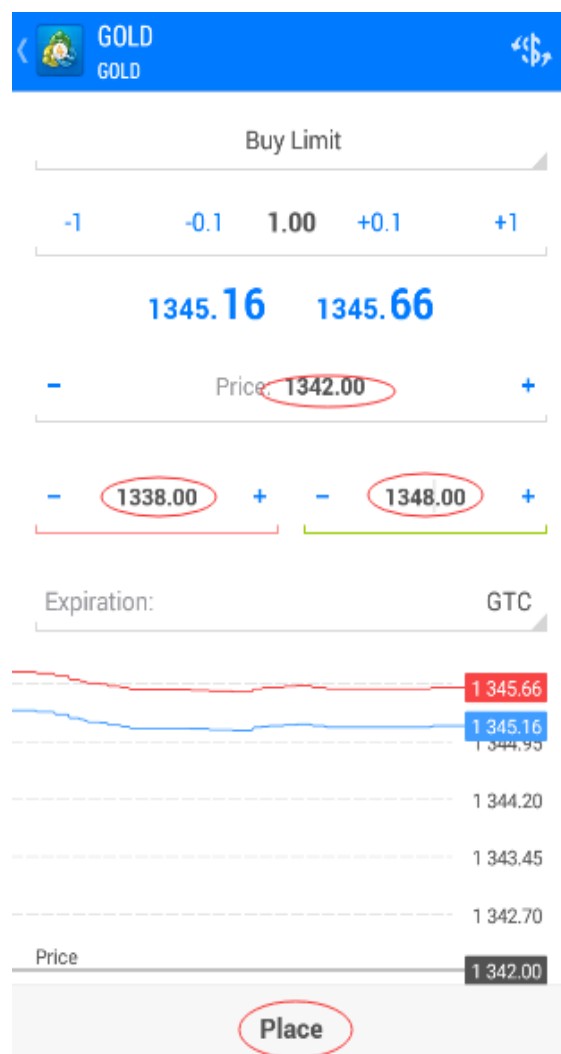

14. Pending order: long press "GOLD" on the market quotes page to pop up "new order"

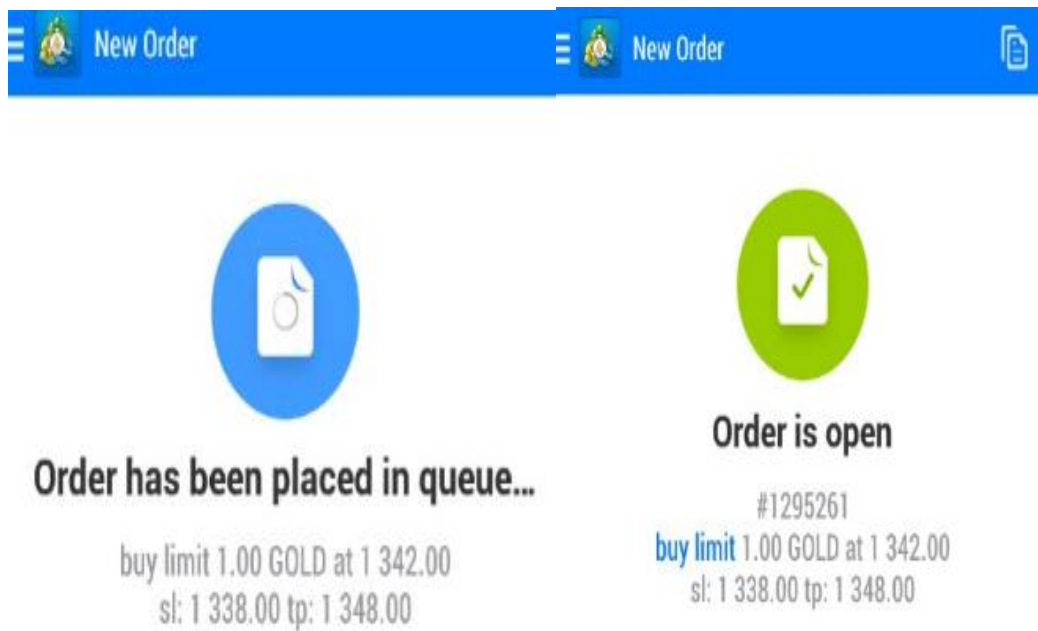

15. The pending order selects one of the four of “buy limit”, “sell limit”, “buy stop” and “sell stop”.

16. Select “Buy Limit”, manually enter the price, set Stop Loss, Take Profit, and click “Place”.

17. Page jump to "order has been placed in queue" and "order is open", click OK.

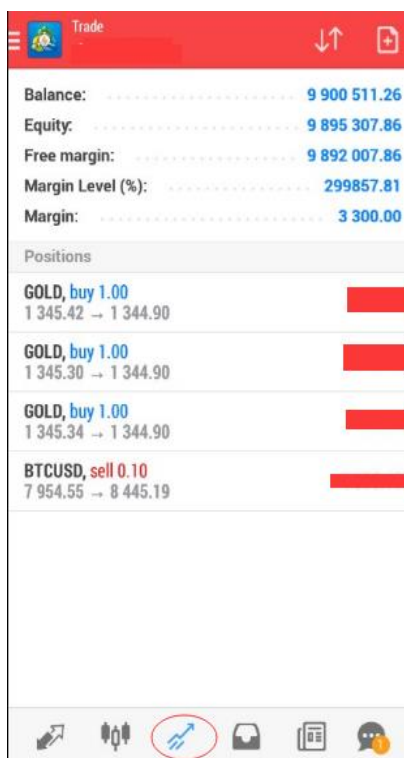

18. If the pending order is successful, you can check the price of the pending order and the stop loss and take profit in the order on the trading page.

25. Click  for history, can view all closing orders

26. Reset password: Click on the account below the market, choose “change password”

below 

27. Enter the current password and two new passwords (the new password requires uppercase and lowercase letters and numbers), click "Next" to modify successfully.

The image displays two sequential screenshots of a mobile application's "Change password" screen. Both screens feature a blue header with a back arrow, a user profile icon, and the text "Change password".

**Left Screenshot:** The screen shows three input fields: "Change master password", "current master password", and "new master password". The "current master password" field has a red error message below it: "Password is not specified". The "new master password" field has a red progress bar and the text "Weak password" below it. A "Password confirmation" field is also present. At the bottom, a text box explains the password requirements: "A-Z Password must be complex enough, at least five symbols long and at least two of the three character types present - lowercase, uppercase, digits".

**Right Screenshot:** The screen shows the same three input fields, now filled with masked characters (dots). The "new master password" field has a green progress bar. The "Password confirmation" field is also filled with masked characters. The "Next" button at the bottom is now visible and highlighted with a red circle.
